We Thank You!

From all of us at Crystal Group Inc., THANK YOU for your purchase of the RS112. Our customers are the lifeline that keeps Crystal going. That is why it is extremely important to us that our customers are 100% satisfied with their product choice.

Crystal products are designed to provide superior performance and reliability in the harshest environments. Our company is ISO-9001:2008 and ASC9100C:2009 certified QMS to show that we are dedicated to providing high quality products to our customers.

We are confident that this server will meet or exceed your expectations for what a rugged industrial/military computer server should accomplish. If you have any questions or concerns, please contact us at one of the options listed in the Contact Information section on page 6.
Safety

Any service should be performed by qualified service personnel. Carefully follow all advisories and instructions in this guide to avoid causing any bodily injury or damage to the unit. This product does not contain any user serviceable parts. Overcurrent protection for the system power must be provided from the installation location.

ADVISORIES

Three types of advisories are used throughout this guide to emphasize important information or to warn of potential hazards to the user or equipment. These advisories each have a specific icon that will stand for one of the following: Note, Warning or Caution. An example of each is shown below:

**NOTE**

A note indicates important information that helps make better use of the equipment.

**WARNING**

A warning indicates a potential for property damage, personal injury, or death.

**CAUTION**

Caution indicates potential damage to hardware or loss of data if instructions are not followed.
HANDLING PRECAUTIONS

This product has components that may be damaged by electrostatic discharge (ESD).

Electrostatic Discharge (ESD)

To protect the equipment from electrostatic discharge, observe the following precautions when handling or storing the RS112 or its components:

1. Always use a grounded wrist strap at the workstation or ground frequently by touching the metal chassis of the system before handling any components. The chassis must be connected to an earth ground.

2. Use antistatic padding on all work surfaces.

3. Avoid static-inducing carpet areas.

4. Keep the electronic components in its static shield bag until ready to perform installation or after removing it from the server.

5. Always handle the memory or expansion cards by the edges.

6. Do not touch the input/output connector pins.

BATTERY DISPOSAL

The following applies to any battery that might be on any board installed in the RS112:

Danger of explosion if battery is incorrectly replaced.

Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer’s instructions.
Contact Information

Crystal's highly trained technical support personnel are dedicated to the service and support of Crystal's customers. Our technical personnel are acutely aware that downtime experienced by a customer is a mission critical event. They excel at providing timely and effective responses to any technical issues encountered in the field. Please contact us with any questions or concerns by using one of the options below:

Customer Service Hours of Operation:
8:00 AM - 5:00 PM Monday through Friday Central Time.

Technical Support Assistance Availability:
7/24/365- 7 days a week; 24 hours a day; 365 days a year.

After hours messaging service is available with a less than 30-minutes response time.

Within the United States: 800-378-1636

International Number: 1+319-378-1636

Product Information

OVERVIEW

The Crystal RS112 is a compact one rack unit (R/U) computer in a 1.75” (1U) high by 17.75” wide by 20.125” deep chassis that is designed for use in a 19” rack mount enclosure (see section Installing the Product for more information) or used as a stand-alone unit. The RS112 consists of an aluminum chassis/enclosure, a power supply, an active motherboard, processor(s), BD/CD/DVD, memory, and storage.

The actual number and type of expansion slots available are motherboard dependent.

SPECIFICATIONS

Mechanical
- Height: 1.75” (4.45 cm)
- Width: 17.75” (45.1 cm)
- Depth: 20.125” (51.11 cm)
- Weight: 15-21 lbs (6.80-9.52 kg) (excludes vibe kit mods)

CPU
- Intel® CPU architecture options from Intel Sandy Bridge
- Embedded long life roadmap dual Hexa Core or dual Octa Core options

Electromagnetic Interference (EMI)
- Environmental kits available for shock, vibration, EMI and humidity.
Expansion Slots

One (1) full-height, 0.75 length slot; combination is configuration dependent

Drive Options

Standard
Two (2) removable SATA or SAS 2.5" or 3.5" HDD

Standard (can be combined with HDD option)
One (1) CD/DVD (R/W) or Blu-ray

Option
Four (4) 2.5" SATA or SAS HDDs

Cooling

High speed, high volume fans (6 + 2 PS)
Thermostatically controlled

Mounting Options

Standard
Mounted on Delrin glides

Option 1
Fixed mount, front and rear

Option 2
Jonathan rails

Power Supply Options

Standard
120/240 VAC w/PFC

Option
24 VDC (MIL-STD kits not available with this option)

System Board

X9DRL-iF, LGA2011 XEON, ATX, 2LAN1000, VGA, 1 PCI 3.3V, 4 PCI-E X8, 1 PCI-E X11, IPMI, IPKVM, SATARAIDX9, SATA3X2

Military Standards

For a complete list of Military Standards visit the Crystal Group website at:
http://www.crystalrugged.com
(Locate product under the PRODUCTS selection).

Commercial Standards

Commercial standards are based on the National Electric Code (NFPA70- National Fire Protection Association). Please visit the following link to learn more about the National Electric Code standards:
http://www.nfpa.org
Installing the Product

GROUNDING

- AC Version- to ensure a good earth ground, the RS112 should be used with a UL listed three-conductor power cord connected to a three-conductor grounded power source.

- DC Version- input installations- use only approved copper connectors.

- Reliable Grounding- reliable grounding of rack mounted equipment should be maintained. Particular attention should be given to supply connections other than direct connections to the branch circuit (e.g., use of power strips). Please see Figure 5 on page 16 for an example image of a ground stud.

RACK MOUNTING PRECAUTIONS

To prevent bodily injury when mounting or servicing this unit in a rack, special precautions must be taken to ensure that the system remains stable. The following guidelines are provided to ensure personal safety:

- If using an equipment rack, make sure to securely bolt the rack frame to the floor or vehicle.

- Elevated Operating Ambient Temperature- if installed in a closed or multi-unit rack assembly, the operating ambient temperature of the rack contents may be greater than room ambient. Therefore, consideration should be given to installing the equipment in an environmentally compatible rack with the manufacturer’s maximum rated ambient temperature.

- Reduced Air Flow- installation of the equipment in a rack should be such that the air flow is not restricted.

- Mechanical Loading- mounting of the equipment in the rack should be such that a hazardous condition is not created due to uneven mechanical loading.

- Circuit Overloading- consideration should be given to how the equipment will be connected to a supply circuit and the effect that the loading of circuits might have on overcurrent protection and supply wiring. Appropriate consideration of the equipment ratings should be used when addressing this concern.

- All electrical wiring should be in accordance with the National Electric Code, or prevailing Military Standards.
INSTALLING THE PRODUCT IN AN EQUIPMENT RACK

Using Fixed Mounting Brackets

To install RS112 with fixed mounting brackets in an equipment rack, complete the steps and see Figure 1 below:

1. Line up eight holes on the sides of the rear mounting brackets with eight holes on the sides of the RS112 chassis and secure to chassis with 16 (eight per side) 8-32 x 0.375" screws provided (see #2 in Figure 1).

   It may not be possible to line up all holes. If more than three holes do not line up on each side, please contact Technical Support.

2. Line up four holes on the front mounting ears at the desired level on the front of the equipment rack, and attach to the rack using four (two per side) 10-32 x 0.75" rack screws provided (see #3 in Figure 1).

3. Line up four holes on the rear mounting ears at the desired level on the rear of the equipment rack, and attach to the rack using four (two per side) 10-32 x 0.50" rack screws provided (see #4 in Figure 1).

Figure 1. RS112 with Fixed Mounting Brackets

Not all chassis support Fixed Mounts
Using Crystal Slides

To install RS112 with Crystal Slides in an equipment rack, complete the following steps and see Figure 2 below:

1. Loosen adjuster screws.

2. Line up the top and bottom holes on the front & rear mounting ears at the desired level of the equipment rack, and attach to the rack using four (two per side) 10-32 x 0.50” rack screws provided (see #1, #2 and #5 in Figure 2).

3. Tighten adjuster screws.

4. Line up the server side slots with the slides and gently push to install in the rack.

5. To secure the server when transporting or when extension of server is not necessary, screw two 10-32 x 0.75” screws into the middle hole of the front bracket ears (see #1 and #4).

Figure 2. Crystal Slides

Not all chassis support Crystal Slides
Using Jonathan Rails

To install RS112 with Jonathan Rails in an equipment rack, complete the following steps below and see Figure 3 on the following page.

1. Attach a bracket (see #6 in Figure 3) to the smooth side of the Jonathan rail that has four or more holes in a row (see #9 in Figure 3). There are five slots on each bracket; when attaching to the rail side with the row of holes, place the first screw in the second slit back from the ear. Make sure the arrow marking is pointing downward.

2. Slowly extend the rail to see the screw access hole that will allow attachment of the four 8-32 x 0.313” screws with four 8-32 X 0.344” keps nuts (see #10 in Figure 3). Place a screw in the first hole and slide the rail to the next hole to insert a screw. Continue until all four screws have been inserted. If the rail slides too far before placing a screw in one of the holes, it may lock into position. Unlock rail by pressing down on the lock mechanism (see #11 in Figure 3).

3. Rail should be fully extended after placing the four screws in the holes and securing to the bracket.

4. Set the appropriate length and attach two 8-32 x 0.313” screws with two kep nuts in the two longer slits provided. Make sure the arrow marking is pointed downward. Keep rail fully extended (see #’s 1 & 2 in Figure 3).

5. Repeat steps 1-4 for the second rail.

6. With rails fully extended, locate the four holes used to attach the rails to each side of the server. Make sure the rails are positioned with the arrow markings pointed downward.

7. Secure to the server using four 8-32 x 0.313” screws for each side.

8. **An assistant may be needed:** Attach the server into the rack mount by installing eight 10-32 x 0.50” screws into the top and bottom holes of the bracket ears (two for front right; two for front left; two for back right and two for back left bracket holes) (see #’s 3, 6, 7 in Figure 3).

9. To secure the server when transporting or when extension of the chassis from the rack mount is not necessary, screw two 10-32 x 1” screws in the middle hole on the front bracket ears (see #4 in Figure 3).

The images on the following page may not depict the product received.

Not all chassis support Jonathan Rails.
Operating the Product

If the RS112 is part of a rack configuration, refer to the rack user’s guide for more information on connecting to a power source.

CONNECTING TO A POWER SOURCE

Please see Installing the Product on page 9 for more information.

POWERING THE SERVER ON

After securely attaching the power connection, press the Power On/Off switch which will be located on either the front or the back of the chassis depending on the specific configuration. A blue LED will illuminate when power is applied (see Figure 4, page 16 for location of power switch and more information about the RS112 chassis).
Maintaining the Product

Only qualified service personnel should attempt to open the RS112 chassis. There are not any user serviceable parts inside.

To protect the equipment from Electrostatic Damage (ESD), follow the proper precautions at all times when handling the RS112 and its components. Please see Electrostatic Discharge section on Page 5.

DRIVER UPDATES

Contact Technical Support at one of the options listed on page 6.

CHASSIS ACCESS

Removing the Cover

1. Ensure the RS112 is powered off and the unit is disconnected from the power source.

2. Remove the screws connecting the top cover to the chassis using a Phillips screw driver.

3. Lift the cover to expose the interior of the chassis.
The images above may not depict the product received.
Input/output (I/O) Ports:

For detailed information about the X9 motherboard option included in the product, please review the guide at the following link:

X9 User Guide

See chapter 2-5- Control Panel Connectors and I/O Ports, page 2-13 in document (page 37 in Adobe PDF format).
EXPANSION/RISER CARD REMOVAL AND REPLACEMENT

Installing a plug-in expansion card requires an appropriate riser card. Contact a Crystal Sales Representative or Technical Support if the system does not include a riser card.

Removing and Replacing the Plug-in Expansion/Riser Card

Disconnect power source to prevent injury.

Installing a plug-in expansion/riser card requires opening the RS112 cover; removing the card cage; inserting the card into the motherboard; replacing the card cage; and disconnecting and reconnecting the appropriate connectors.

Do not force the card. Forcing the card may result in equipment damage. If it does not slide into place, check the alignment and try again.

Please reference Figure 6 on the next page.

Steps:

1. Turn the unit OFF and disconnect the unit from the power source.

2. Remove the chassis cover (see Removing the Cover on page 15).

3. The card cage is retained by three screws, two from the rear of the unit and one at the end of the retention bar. Locate and loosen. Carefully slide card cage forward and lift from chassis.

4. Remove the corresponding expansion slot filler bracket if installed or remove card.

5. Align the expansion card with the appropriate slot and press the expansion card in firmly. Set the plug-in cards into the riser card and attach using the pan head screws supplied with the filler plate.

6. With the expansion card in place within the slot, install the screw and tighten to hold the card in place.

7. Re-attach card cage assembly to chassis with the three screws.

8. Attach appropriate connectors.

9. Replace chassis cover.
Figure 6. RS112 Expansion/Riser Card Installation

The image above may not depict the product received.
HARD DRIVE REMOVAL AND REPLACEMENT

Removing and Replacing the Carrier/Hard Drive Assembly

The procedure below may be different depending on the explicit drive contained in the product.

Steps:

1. Power the system down (unless a drive controller supporting hot-swap has been installed- contact Technical Support with any questions).

2. Unscrew both thumbscrews on the face of the carrier to be removed (please see circled area in Figure 7 below). If thumbscrews are too tight, use a flathead screwdriver to loosen.

3. Grasp the handle and pull the carrier/drive assembly straight out of the face of the system.

4. Remove the drive by removing the four Phillips head screws from bottom of the carrier sled.

5. Install replacement drive into carrier and secure with the four Phillips head screws (a thread-lock solution is recommended).

6. Re-install carrier/drive assembly into the system.

7. Tighten thumbscrews to secure the drive.

8. Reapply power to the server, rebuilding any RAID arrays as necessary.

Figure 7. Drive Removal and Replacement

The image above may not depict the product received.
MEMORY REMOVAL AND REPLACEMENT

Removing and Replacing the Memory

Contact Crystal Technical Support before performing a memory upgrade. Use only Crystal-approved memory for upgrades.

Disconnect power source to prevent injury.

Do not force the DIMM. Forcing the DIMM may result in equipment damage. Check the alignment and keying before installing.

For population order see the motherboard guide received or contact Technical Support.

Steps:

1. Turn the unit OFF and disconnect the unit from the power source.
2. Open up chassis cover (see Removing the Cover in the Chassis Access section on page 15).
3. If removal is required, locate the memory card area and open both DIMM release levers by placing one finger on each lever and pushing outward. See Figure 8 on next page.
4. The DIMM will lightly pop out of the slot. Remove the old DIMM.
5. Check the orientation or key when adding new DIMM.
6. Press the DIMM into its slot evenly on both ends until it clicks into place. The DIMM release levers will snap into place.
7. The DIMM is properly seated when the release levers have fully engaged.
Figure 8. Installing Memory
Troubleshooting

CONTACT TECHNICAL SUPPORT

If any problems arise when using the RS112, please contact Technical Support at one of the options listed on page 6. Before calling, please have the following information available to help expedite assistance:

1. Unit serial number
2. Brief description of the problem
3. Brief explanation of the steps already taken to isolate and resolve the problem
Available Warranty

CRYSTAL GROUP LIMITED WARRANTY

Seller warrants to the Buyer that the products manufactured by it will be free from defects in material and workmanship under normal use and service for the time period specified herein. Seller’s sole obligation under this warranty shall be the repair or replacement of any part or parts which prove to be defective under normal use and service within three (3) years from the date of delivery to the Buyer. To receive the benefits of this warranty, the Buyer must return said allegedly defective part or parts to Seller’s facility in Hiawatha, Iowa, or other location specified by Seller, within the time period set forth above. A warranty extension contract is available if purchased, potentially extending the coverage to ten (10) years. Terms and Conditions of the extension period are dictated in a separate agreement. Customer bears the risk of loss or damage of equipment in transit from Buyer to Seller. The Buyer shall also pay the costs of shipping and handling for any service other than Standard Ground or Air Transportation from Seller’s factory to Buyer’s specified destination. Correction by Seller of the defects in the manner provided above shall constitute a fulfillment of all liabilities of Seller with respect to this warranty. Buyer shall pay all costs of removal of any part or parts and reinstallation thereof. Seller’s sole liability under this warranty shall be either (a) to repair or to replace, at Seller’s option, the defective component in accordance with the above procedure, or (b) if Seller reasonably determines that it is unable to resolve the defect by repair or replacement, to refund the purchase price upon return of the defective item. The warranty period for repaired or replaced components shall be the remainder of the original warranty period for the repaired or replaced item. Specifically excluded from this warranty are any products not provided by Seller. Seller will however provide the labor to remove, install, and test excluded products at Seller’s facility (or a facility authorized by Seller) to the extent that the Buyer agrees to purchase replacement parts or to the extent that an applicable warranty replacement is available from the OEM of the part. Under no circumstances will this warranty apply to any software products or preventative maintenance service.

THIS WARRANTY IS EXPRESSLY IN LIEU OF, AND BUYER EXPRESSLY WAIVES, ALL OTHER WARRANTIES EXPRESSED OR IMPLIED BY STATUTE, USAGE, CUSTOM OF THE TRADE OR OTHERWISE, INCLUDING THE WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE AND OF ALL OTHER OBLIGATIONS OR LIABILITIES ON SELLER’S PART. ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE IS HEREBY EXPRESSLY EXCLUDED AND DISCLAIMED. SELLER NEITHER ASSUMES NOR AUTHORIZES ANY OTHER PERSON TO ASSUME FOR IT, ANY OTHER OBLIGATION OR LIABILITY IN CONNECTION WITH THE SALE OF THIS COMPUTER PRODUCT. SELLER’S WARRANTY SHALL NOT APPLY TO THIS COMPUTER PRODUCT OR ANY PART THEREOF WHICH HAS BEEN SUBJECT TO ACCIDENT, NEGLIGENCE, ALTERATION, ABUSE, OR MISUSE. THIS WARRANTY SHALL NOT APPLY TO ANY PRODUCT FROM WHICH THE ORIGINAL SERIAL TAG HAS BEEN REMOVED. SELLER MAKES NO WARRANTY WHATSOEVER IN RESPECT TO ACCESSORIES OR PARTS NOT SUPPLIED BY SELLER. BUYER AGREES THAT SELLER SHALL NOT BE LIABLE FOR ANY PROXIMATE, CONSEQUENTIAL, PUNITIVE, SPECIAL OR INDIRECT DAMAGES OF ANY AMOUNT DUE TO ANY CAUSE, INCLUDING, WITHOUT LIMITATION, ANY LOST PROFITS, LOSS OF USE, COSTS OF DELAY, ETC. BUYER FURTHER AGREES THAT BUYER’S SOLE AND EXCLUSIVE REMEDY AGAINST SELLER FOR ANY CLAIM OF ANY KIND, INCLUDING BREACH OF WARRANTY, NEGLIGENCE, STRICT LIABILITY IN TORT, OR PRODUCT LIABILITY, ANY DELAY IN MANUFACTURE OR DELIVERY OF EQUIPMENT OR PRODUCT, OR FOR ANY FAILURE OF SELLER TO COMPLY WITH THIS AGREEMENT SHALL BE THE REPAIR OR REPLACEMENT OF THE PRODUCTS AS PROVIDED HEREIN. (REVISED DECEMBER ‘11)
Legal Information

THE SPECIFICATIONS AND INFORMATION REGARDING THE PRODUCTS IN THIS GUIDE ARE SUBJECT TO CHANGE WITHOUT NOTICE. ALL STATEMENTS, INFORMATION, AND RECOMMENDATIONS IN THIS GUIDE ARE BELIEVED TO BE ACCURATE BUT ARE PRESENTED WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED. USERS MUST TAKE FULL RESPONSIBILITY FOR THEIR APPLICATION OF ANY PRODUCTS.

THE SOFTWARE LICENSE AND LIMITED WARRANTY FOR THE ACCOMPANYING PRODUCT ARE SET FORTH IN THE INFORMATION PACKET THAT SHIPPED WITH THE PRODUCT AND ARE INCORPORATED HEREBY BY THIS REFERENCE. IF UNABLE TO LOCATE THE SOFTWARE LICENSE OR LIMITED WARRANTY, CONTACT YOUR CRYSTAL REPRESENTATIVE FOR A COPY.

NOTWITHSTANDING ANY OTHER WARRANTY HEREIN, ALL DOCUMENT FILES AND SOFTWARE OF THESE SUPPLIERS ARE PROVIDED "AS IS" WITH ALL FAULTS. CRYSTAL AND ALL NAMED SUPPLIERS DISCLAIM ALL WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, THOSE OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OR ARISING FROM A COURSE OF DEALING, USAGE, OR TRADE PRACTICE.

IN NO EVENT SHALL CRYSTAL GROUP INC., OR ITS SUPPLIERS BE LIABLE FOR ANY INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES, INCLUDING, WITHOUT LIMITATION, LOST PROFITS OR LOSS OR DAMAGE TO DATA ARISING OUT OF THE USE OR INABILITY TO USE THIS GUIDE, EVEN IF CRYSTAL OR ITS SUPPLIERS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

The following information is for FCC compliance of Class A devices: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio-frequency energy and, if not installed and used in accordance with the instruction guide, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case users will be required to correct the interference at their own expense.

The following information is for FCC compliance of Class B devices: The equipment described in this guide generates and may radiate radio-frequency energy. If it is not installed in accordance with Crystal’s installation instructions, it may cause interference with radio and television reception. This equipment has been tested and found to comply with the limits for a Class B digital device in accordance with the specifications in part 15 of the FCC rules. These specifications are designed to provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation.

Modifying the equipment without Crystal’s written authorization may result in the equipment no longer complying with FCC requirements for Class A or Class B digital devices. In that event, the right to use the equipment may be limited by FCC regulations, and correction of any interference to radio and television communications may be required at the owner's expense.

To determine whether the equipment is causing interference, turn the equipment off. If the interference stops, it was probably caused by the Crystal equipment or one of its peripheral devices. If the equipment causes interference to radio or television reception, try to correct the interference by using one or more of the following measures:

- Turn the television or radio antenna until the interference stops.
- Move the equipment to one side or the other of the television or radio.
- Move the equipment farther away from the television or radio.
- Plug the equipment into an outlet that is on a different circuit from the television or radio (that is, making certain the equipment and the television or radio is on circuits controlled by different circuit breakers or fuses).

CERTIFICATIONS AND LICENSES

EACH PRODUCT MANUFACTURED WITHIN CRYSTAL GROUP INC., IS MARKED WITH THE APPROPRIATE CERTIFICATION OR LICENSE SYMBOLS THAT APPLY. IF THERE ARE ANY QUESTIONS ABOUT THE LICENSES AND/OR CERTIFICATIONS THAT CRYSTAL OBTAINS, PLEASE CONTACT A CRYSTAL REPRESENTATIVE AT ONE OF THE OPTIONS LISTED ON THE CONTACT INFORMATION SECTION LOCATED ON PAGE 6.

THANK YOU FOR YOUR BUSINESS.
